Identification via database searches | Base+DT+U

Identification

Records identified
Database-query occurrences: 903
Not deduplicated publications

Records removed before screening
Duplicate occurrences: 375
Duplicate occurrences across query exports

Screening

Records screened: 528

Records removed at screening: 220
Outside domain: 218
Additional duplicate aliases: 2

Retrieval / eligibility

Reports selected for retrieval and assessment: 308

Retrieval / assessment pending: 217
Includes 2 defective retrieved files
Not classified as full-text exclusions

Reports assessed for eligibility: 91

Reports excluded from strict domain-DT-U intersection: 66
Individual reasons remain in decision ledger

Included

Assessed reports included
Domain synthesis: 21
Complementary synthesis: 4

Database identification and report selection

Reports sought/not retrieved and independent-study counts are not yet closed.
