Base + U: selected S1–S5 report eligibility

Selected reports

Previously selected reports
S1–S3 and S4–S5 sets (n = 21)

Selected reports forwarded
for retrieval (n = 21)

Retrieval / eligibility

Reports sought for retrieval (n = 21)

Reports not retrieved (n = 1)

Reports assessed for eligibility
(n = 20)

Full-text reports excluded (n = 0)
All 20 assessed reports retained

Included

Reports included (n = 20)
Same 20-paper denominator in
source, method and outcome profiles

Selected-set eligibility flow, not a reconstructed database-wide PRISMA. Shared S4–S5 Base/Base+U retrieval: 19,963 occurrences; 9,587 unique records; 3,610 retained candidates, including 392 U-focused candidates. Those shared counts are not an independent B+U identification denominator and are not connected to the 21-report flow.
