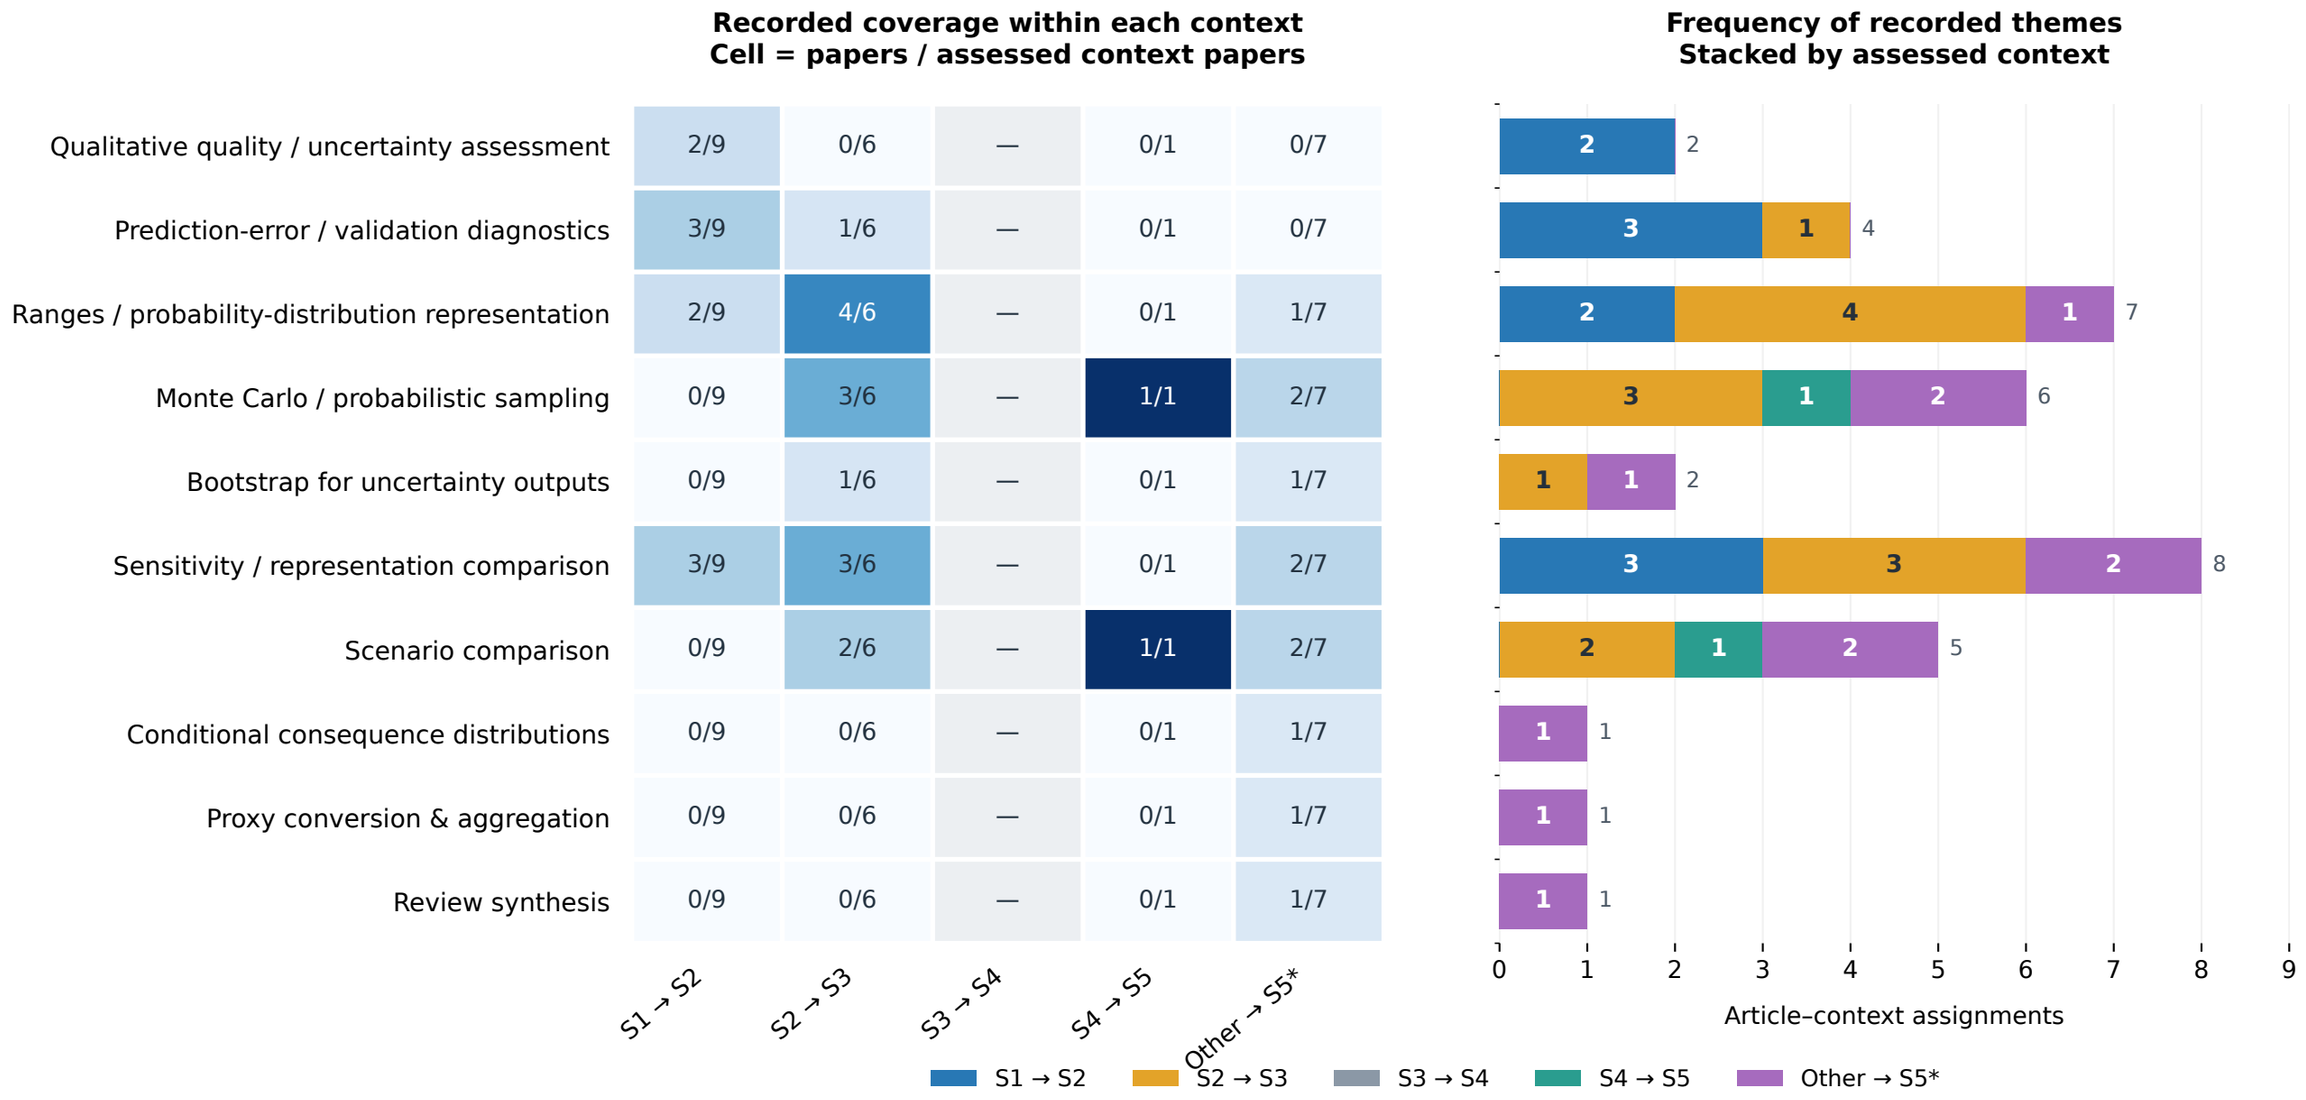
# How is uncertainty analysed within the cluster?

S1–S5 + uncertainty working evidence set • 20 assessed papers • 1 abstract-only record excluded



Colour intensity: 0–100% recorded coverage. Grey dash: no assessed article in this context; not evidence of absence.

* Other → S5 includes quantity/factor/damage-to-impact pathways. It is not relabelled as recovery → impact.

Themes and contexts may overlap within one paper. Bars count assignments, not unique-paper totals. No significance test.
